360 LOAD TESTING SERVICES (PTY) LTD

September / October 2018 Newsletter

Volume 1, Issue 1

25 September 2018

Most common faults that some clients did not know:

- Equipment shall be thoroughly examined and tested after every major repair or modification.
- Ensure that all control levers are marked with their function and mode of operation.
- Ensure that manufacturers' load plates are firmly attached and readable from the control positions.
- Ensure that the cam locks on the beams function correctly.
- Ensure that all controls return to neutral when released.
- Ensure that the safety latch is correct and safe for use.

LOADER CRANES

WHY USE 360 LOAD TESTING SERVICES?

We load test and inspect your loader crane (also known as a truck mounted crane) in accordance with the Driven Machinery Regulation 18 of the OHS Act, and also in accordance with SANS 19 : 2015. We provide you with a emailed copy of your certificate within 24 hours!!

DON'T WAIT!!

To prevent your cranes from tipping or breaking, load test them now! DO NOT WAIT until it is TOO LATE!!
